讲稿 Script (例词旁直接标音标)

This is a long vowel sound. It's pronounced /i:/. Now you try - repeat after me: /i:/ /i:/.

Now here are some words which have this sound: **fleece** /fli:s/, **sea** /si:/, **machine** /mə'ʃi:n/. Now you try - repeat after me: **fleece** /fli:s/, **sea** /si:/, **machine** /mə'ʃi:n/. Good.

For speakers of some languages, it can be difficult to tell the difference between this sound the long vowel /i:/ and another sound: the short vowel /ɪ/. Here are some examples where you can hear the difference: **litre** /'li:tə/ - **litter** /'lɪtə/, **cheap** /tʃi:p/ - **chip** /tʃɪp/, **feet** /fi:t/ - **fit** /fɪt/, **he's** /hi:z/ - **his** /hɪz/, **peach** /pi:tʃ/ - **pitch** /pɪtʃ/, **sheep** /ʃi:p/ - **ship** /ʃɪp/. Now you try - listen carefully and repeat after me. In each example the vowel with the long sound is first: **litre** /'li:tə/ - **litter** /'lɪtə/, **cheap** /tʃi:p/ - **chip** /tʃɪp/, **feet** /fi:t/ - **fit** /fɪt/, **he's** /hi:z/ - **his** /hɪz/, **peach** /pi:tʃ/ - **pitch** /pɪtʃ/, **sheep** /ʃi:p/ - **ship** /ʃɪp/. Good.

讲稿 Script (例词旁直接标音标)

This is a short vowel sound - it's pronounced /ə/, and to make this sound you just relax your mouth. You try - listen and repeat: /ə/, and again /ə/. In fact, this is a very common sound in English, and in many grammar words it's the only vowel sound, such as: 'a /ə/', 'the /ðə/', 'of /əv/', 'that /ðət/'. Let's practice these - listen and repeat: 'a /ə/', 'the /ðə/', 'of /əv/', 'that /ðət/'. Now you also get this sound in many words of more than one syllable - listen: 'about /ə'baʊt/', 'common /'kɒmə'n/', 'standard /'stændəd/', 'butter /'bʌtə/'. Let's practice - listen to me and repeat: 'about /ə'baʊt/', 'common /'kɒmə'n/', 'standard /'stændəd/', 'butter /'bʌtə/'. Good.

You could say that the vowel /ə/ is the most important vowel in English. In fact, it's so important it has its own name - it's called John. No, not really— it's actually called **schwa** /ʃwɑː/, **schwa** /ʃwɑː/, which is pretty strange when you think about it, because the word schwa doesn't have the schwa sound in it.

So, why is this sound so important? Well it's a very natural sound for English speakers and it's actually the most frequent sound in English. It appears in just about every word with more than two syllables and it's very important for getting the stress and rhythm of English right. Schwa is usually in unstressed syllables. Let's have a look at some examples: 'accuse /ə'kjuːz/', 'banana /bə'nɑːnə/', 'father /'fɑːðə/', 'camera /'kæmrə/'. OK. Now you try - listen and repeat: 'accuse /ə'kjuːz/', 'banana /bə'nɑːnə/', 'father /'fɑːðə/', 'camera /'kæmrə/'.

Now as well as being a part of many words, schwa can also be the pronunciation for a whole word itself and to show you this I'm going to need an assistant. **A cup of tea**, thank you. An ordinary cup of tea but listen to what happens when I say the words 'a /ə/' and 'of /əv/' naturally: **a cup of tea /ə'kʌpə tiː/** - **a cup of tea /ə'kʌpə tiː/**. The words 'a /ə/' and 'of /əv/' become schwa /ə/. Now you try - listen and repeat after me: 'a cup of tea /ə'kʌpə tiː/' - 'a cup of tea /ə'kʌpə tiː/'. Good. Now this is such a natural and common way to pronounce 'cup of' that in British English the word 'cuppa /'kʌpə/' actually means 'a cup of tea /ə'kʌpə tiː/', and after all that I'm really looking forward to my **cuppa /'kʌpə/**. Actually, what I really fancy is **a piece of cake /ə'piːsə keɪk/**.

Now let's look at some words with a sound /ʃ/ in them: it's found at the beginning of the words 'ship /ʃɪp/' and 'sure /ʃʊːr/', in the middle of the word 'nation /ˈneɪʃən/', at the end of the word 'fish /fɪʃ/' and at the beginning and end of the word 'shush /ʃʊʃ/. now you try - listen and repeat after me: ship /ʃɪp/, sure /ʃʊːr/, nation /ˈneɪʃən/, fish /fɪʃ/, shush /ʃʊʃ/. Good.

For speakers of some languages it may be difficult to tell the difference between the sound /ʃ/ and the consonant /s/, especially at the beginning of words. Did you notice the difference in the shape of my lips? Watch - /ʃ/. Listen carefully to the following examples - for each example I'll say the word with /ʃ/ at the beginning first: ship /ʃɪp/ - sip /sɪp/, show /ʃəʊ/ - so /səʊ/, shy /ʃaɪ/ - sigh /saɪ/, chauffeur /ˈʃəʊfə/ - sofa /ˈsəʊfə/, shock /ʃɒk/ - sock /sɒk/. This is a consonant sound. In English, you will never find it at the beginning of a word, because it only comes at the end of a syllable. You find it in the middle of **anger** /'æŋgə/ and **thanks** /θæŋks/, and at the end of **rung** /rʌŋ/. We make this sound towards the back of the mouth. If you make it correctly, you can feel a vibration in your nose. Now let's practise: **rung** /rʌŋ/, **anger** /'æŋgə/, **thanks** /θæŋks/.

It can be difficult to hear the difference between /ŋ/ and the similar consonant /n/. Listen carefully: **rung** /rʌŋ/, **run** /rʌn/. /ŋ/ is made at the back of the mouth, and /n/ is made behind the teeth. Now you try: **rung** /rʌŋ/, **run** /rʌn/. Let's have some more examples. Listen first: **tongue** /tʌŋ/, **ton** /tʌn/; **wing** /wɪŋ/, **win** /wɪn/; **robbing** /'rɒbɪŋ/, **robin** /'rɒbɪn/; **singer** /'sɪŋə/, **sinner** /'sɪnə/. This is a voiceless consonant. It makes very little sound because it is really just your breath. You can **hear** /hɪə/ it at the beginning of the word '**hear** /hɪə/'. You can also **hear** /hɪə/ it at the beginning of the words '**hot** /hɒt/' and '**hello** /hə'ləʊ/', and in the middle of the word '**ahead** /ə'hed/'. In English, you will never **hear** /hɪə/ this sound at the end of syllables and words. You only find it at the beginning of the syllable. Now, let's listen to some examples: '**here** /hɪə/', '**hot** /hɒt/', '**hello** /hə'ləʊ/', '**ahead** /ə'hed/', '**height** /haɪt/', '**hedge** /hedʒ/', '**how** /haʊ/'. Now, you try. This is a consonant sound. You can hear it at the beginning of the word **'light /laɪt/**, in the middle of the word **'valley /'væli/**, at the end of the word **'bell /bel/**, and at the beginning and end of the word **'level /'levəl/**. Now, you try. Listen and repeat: **'light /laɪt/**, **'valley /'væli/**, **'bell /bel/**, **'level /'levəl/**. OK.

Speakers of some languages may find it difficult to **tell /tel/** the difference between this sound and another consonant. Now, listen carefully to hear the difference between the following two words and watch the position of my mouth: **'light /laɪt/**, **'right /raɪt/**, **'light /laɪt/**, **'right /raɪt/**. I make the **/l/** sound with the front part of my tongue behind my teeth, and I make the **/r/** sound by making my lips come out and pulling my tongue back. Now, listen to some examples and watch the shape of my mouth: **'lead /led/**, **'red /red/**, **'clash /klæʃ/**, **'crush /krʌʃ/**, **'climb /klaɪm/**, **'crime /kraɪm/**, **'lice /laɪs/**, **'rice /raɪs/**, **'lock /lɒk/**, **'rock /rɒk/**. Now, you try. Listen again and repeat after me: **'lead /led/**, **'red /red/**, **'clash /klæʃ/**, **'crush /krʌʃ/**, **'climb /klaɪm/**, **'crime /kraɪm/**, **'lice /laɪs/**, **'rice /raɪs/**, **'lock /lɒk/**, **'rock /rɒk/**. OK.

In English, **/l/** at the beginning of the syllable is a bit different from **/l/** at the end of a syllable. Listen carefully: **'leaf /li:f/**, **'feel /fi:l/**, **'leaf /li:f/**, **'feel /fi:l/**, and **'let /let/**, **'tell /tel/**, **'let /let/**, **'tell /tel/**. Did you hear that little difference? listen again: Now for some speakers of English, this can change the vowel a little bit - listen again: **'loaf /ləʊf/**, **'foal /føʊl/**, **'loaf /ləʊf/**, **'foal /føʊl/** and **'loot /lu:t/**, **'tool /tu:l/**, **'loot /lu:t/**, **'tool /tu:l/**. Now, this can actually make the **/l/** sound disappear at the end of a syllable. So, I can say **pal /pæl/** or **pal /pæɪ/**; I can say **pill /pɪl/** or **pill /pɪɪ/**, **mile /maɪl/** or **mile /maɪɪ/**, **milk /mɪlk/** or **milk /mɪɪk/**, **cold /kəʊld/** or **cold /kəʊɪld/** so be careful there's a bit of a difference

This is a consonant sound - you can hear it at the beginning of the words 'right /raɪt/' and 'wrong /rɒŋ/', and in the middle of the words 'sorry /'sɒri/' and 'arranged /ə'r'eɪndʒd/'. Now watch my mouth while I'm saying this sound: /r/ - my lips come out and I pull my tongue back /r/. OK, let's practice - repeat after me: **right /raɪt/**, **wrong /rɒŋ/**, **sorry /'sɒri/**, **arranged /ə'r'eɪndʒd/**. OK.

For speakers of some languages, it may be difficult to tell the difference between this sound /r/ and another consonant /l/. Now listen carefully to the following examples and watch the shape of my mouth. For each example, I'll say the word with the sound first: **wrong /rɒŋ/** - **long /lɒŋ/**, **royal /'rɔɪəl/** - **loyal /'ləɪəl/**, **misread /mɪ'sri:d/** - **misled /mɪ'sled/**, **pirate /'paɪrət/** - **pilot /'paɪlət/**, **prey /preɪ/** - **play /pleɪ/**. Now let's practice - listen carefully and repeat after me: **wrong /rɒŋ/** - **long /lɒŋ/**, **royal /'rɔɪəl/** - **loyal /'ləɪəl/**, **misread /mɪ'sri:d/** - **misled /mɪ'sled/**, **pirate /'paɪrət/** - **pilot /'paɪlət/**, **prey /preɪ/** - **play /pleɪ/**. OK.

Now in standard southern English, you won't usually hear this sound at the end of a syllable or word. Listen to the following examples: **car /kɑ:/**, **card /kɑ:d/**, **bored /bɔ:d/**, **here /hɪə/**, **heard /hɜ:d/**. OK. Let's practice these - listen and repeat: **car /kɑ:/**, **card /kɑ:d/**, **bored /bɔ:d/**, **here /hɪə/**, **heard /hɜ:d/**. Now you will hear this sound at the end of a word if the following word begins with a vowel - listen to the following two sentences: this is my **car /kɑ:/**, my **car /kɑ:/** is **blue /blu:/**. In the first sentence 'this is my **car /kɑ:/**', you don't hear the sound because it's at the end of the sentence. In the second example 'my **car /kɑ:/** is **blue /blu:/**', the following word is begins with a vowel - so, let's practice this: **car /kɑ:/**, **car /kɑ:/** is - my **car /kɑ:/** is - my **car /kɑ:/** is **blue /blu:/**. OK.
